

Annual Budget Report -- Fiscal Year 2026

Nimbus Analytics Inc. -- Finance Department

Approved by the Board of Directors: December 2025

1. Overview

This report summarizes the approved operating budget for Fiscal Year 2026, allocated across Engineering, Sales & Marketing, G&A, and Security/Compliance functions, and reflects the growth priorities set by the Board in the December 2025 planning cycle.

2. Departmental Allocations

Engineering (including the Data Platform, Ingestion, and Query Service teams referenced in the System Architecture Overview): \$27.5M, representing 34% of the total \$80.9M budget. Sales & Marketing: \$21.8M (27%). G&A: \$12.9M (16%). Security & Compliance: \$6.2M (8%), reflecting increased investment following SOC 2 Type II certification. Infrastructure/Hosting (CloudPeak Systems contract, see Vendor Contract Summary): \$9.1M (11%). Facilities and other: \$3.4M (4%).

3. Headcount Plan

The FY2026 budget supports growth from 312 to approximately 385 employees, with the largest planned growth in Engineering (+35) and Sales (+22). Hiring is gated quarterly against actual revenue attainment versus the guidance set in the Q1 and Q2 Earnings Summaries.

4. Capital Expenditures

Planned capital expenditures of \$2.1M are allocated primarily to expanding ClickHouse cluster capacity ahead of anticipated data volume growth and to the secondary-region disaster recovery buildout described in the System Architecture Overview.

5. Contingency and Risk

A contingency reserve of 5% (\$4.0M) is held against the operating budget to absorb unplanned costs such as the exception remediation work noted in the SOC 2 Compliance Report or unplanned vendor contract renegotiations.

6. Budget Governance

Departmental budget owners submit quarterly variance reports to Finance; variances exceeding 10% of the quarterly allocation require CFO approval to proceed. This report is reviewed against actuals at each quarterly earnings cycle.
